

When Daniel Sheppard entered the priesthood, he thought he finally found the peace he had sought his entire life. His thirst for knowledge and his desire to question everything sometimes ruffled feathers within the church, but his passion and inspiration moved and stimulated his parishioners.

His peace became short lived when his brother in the government uncovered a conspiracy spanning the church, the government, and several other agencies. Daniel was resistant to become swept into these events, focusing instead on his work in the church. It wasn't until a curious child came into his life that he began to question everything, and he was set on a most unexpected path.

Going against the will of the Archbishop, Father Daniel joined Isis, a group of scholars from various religions. Together they sought answers--they sought a Golden Thread; a commonality which linked all religions together.

Along the way, they discovered that their spiritual progression was tied to their overlapping beliefs. But Daniel did not expect this new path to lead him toward one of the most amazing and wondrous spiritual revelations of the modern era.
